

Sentra Artificial Intelligence

Brand Guidelines v1.0

1. Brand Foundation

Official name: Sentra Artificial Intelligence

Primary typeface: Geist Sans (Vercel)

Technical typeface: Geist Mono

Primary dark: #0D1117

Primary accent: #5B8CFF

The identity system is intentionally restrained. Black and white carry the core identity; Intelligence Blue is reserved for interaction, focus, selection and emphasis. The approved logomark is the single source of truth and must never be regenerated or redrawn.

2. Master Logomark

Use black on light surfaces and white on Sentra Dark or other sufficiently dark surfaces. Do not rotate, skew, stretch, outline, add shadow, glow, gradient, bevel or 3D treatment.

Master geometry derived from the approved project reference.

3. Clear Space and Minimum Size

Minimum clear space: 1X on every side, where X is the approximate width of one diagonal band. Icon minimum: 16 px digital / 6 mm print. Full corporate lockup: 180 px digital / 30 mm print.

4. Color System

	sentra-dark	#0D1117
	sentra-white	#FFFFFF
	sentra-black	#000000
	sentra-blue-500	#5B8CFF
	sentra-blue-600	#315FD6
	sentra-text-primary	#F5F7FA
	sentra-text-secondary	#A8B3C2

5. Typography

Geist Sans

Official primary typeface. Use 400 for body, 500 for UI, and 500-600 for headings. The corporate lockup source SVG uses live Geist text. Font binaries are intentionally not included in this package.

Geist Mono

Technical/data/code contexts only. Keep the brand voice calm, precise and readable; avoid decorative futuristic display fonts.

6. Digital and Social

The package includes ready-sized logo-only exports for Website, LinkedIn, X, GitHub, Instagram and YouTube. Platform dimensions were re-verified during production. Re-verify before future exports because platform requirements can change.

7. Usage Rules

- Use supplied SVG/PNG masters.
- Preserve original proportions and orientation.
- Maintain clear space and contrast.
- Use black/white as default logo colors.
- Do not regenerate the mark with AI.
- Do not use blue as the default master mark.
- Do not add effects, gradients, shadow or outlines.
- Do not distort the mark to fit a container.

8. Handoff

Developer: use SVG/currentColor sources, favicon/PWA exports and token files. Load Geist through the official package; do not redraw the mark in CSS. Marketing: use curated platform exports and templates; do not reconstruct the logo in third-party editors. Partner: use only the co-brand templates supplied for the relevant collaboration.
